### **WAC 246-272-15501 Operation and Maintenance.**

- (1) The OSS owner is responsible for properly operating and maintaining the OSS, and shall:
- (a) Determine the level of solids and scum in the septic tank once every three years;
  - (b) Employ an approved pumper to remove the septage from the tank when the level of solids and scum indicates that removal is necessary;
  - (c) Protect the OSS area and the reserve area from:
    - (i) Cover by structures or impervious material;
    - (ii) Surface drainage;
    - (iii) Soil compaction, for example by vehicular traffic or livestock; and
    - (iv) Damage by soil removal and grade alteration;
  - (d) Keep the flow of sewage to the OSS at or below the approved design both in quantity and waste strength;
  - (e) Operate and maintain alternative systems as directed by the local health officer; and
  - (f) Direct drains, such as footing or roof drains away from the area where the OSS is located.
